ABSTRACT

This annual survey provides data on the status of programs leading to associate degrees, diplomas, and other awards based on less than 4 years of work beyond high school in US institutions of higher education. It covers degrees awarded between July 1, 1968 and June 30, 1969. Detailed listings of specific awards granted by each institution, by type of organized occupational curriculum, and by type of associate degree conferred constitute the greater portion of the report. Summary tables present overall counts of awards conferred and include subtotals by control and level of institution, state, and curriculum. (JS)

HIGHLIGHTS

1. Conferrals of 184,113 associate degrees were reported by 1,062 U.S. institutions of higher education during 1968-69. This number of degrees was an increase of 15 percent over the 160,054 reported for the year 1967-68.

2. In 1968-69, 1,249 institutions of higher education submitted data on awards below the bachelor's level, a response rate of 100 percent. This number of institutions was an increase of 114 (10 percent) over those responding to the 1967-68 survey.

3. Of the 118,666 awards in organized occupational curriculums, 108,088 were at the technical or semiprofessional level and 10,578 were below that level during 1968-69.

4. In 1968-69, men received:

   58 percent of all associate degrees (57 percent in 1967-68).
   58 percent of all awards based on organized occupational programs of at least 2 but less than 4 years (58 percent in 1967-68).
   36 percent of all awards based on curriculums of at least 1 but less than 2 years (38 percent in 1967-68).

5. At the technical or semiprofessional level in 1968-69, the three leading categories of organized occupational curriculums with the number of awards made were: business- and commerce-related, 41,465; engineering-related, 26,736; and health service, 21,876.

FOREWORD

This survey is conducted annually by the U. S. Office of Education in order to provide data on the status of programs which lead to associate degrees, diplomas, and other awards based on less than 4 years of work beyond high school in institutions of higher education in the United States.

The questionnaire Degrees and Other Formal Awards Conferred Between July 1, 1968 and June 30, 1969, on which this report is based, was part of the fourth Higher Education General Information Survey (HEGIS).

Detailed listings of specific awards granted by each institution, by type of organized occupational curriculum and by type of associate degree conferred, constitute the greater portion of this report. Summary tables present overall counts of awards conferred and include subtotals by control and level of institution, State, and curriculum.

The U. S. Office of Education appreciates the efforts of the institutions of higher education in responding to this survey. The present study was made possible by their cooperation.

Theodore H. Drews, Chief
Higher Education Surveys Branch

INTRODUCTION

Historical Background of Survey

Beginning in 1965-66 with the Office of Education's first "Higher Education General Information Survey" (HEGIS I), data on associate degrees and other formal awards below the baccalaureate have been collected from the questionnaire in part C of the annual HEGIS survey of Degrees and Other Formal Awards Conferred. Data from the surveys of 1965-66 and 1966-67 were published in a combined report Associate Degrees and Other Formal Awards Below the Baccalaureate, 1965-66 and 1966-67 (OE-54045).

The second report in the series, from the third HEGIS survey--that for 1967-68--was titled Associate Degrees and Other Formal Awards Below the Baccalaureate, 1967-68 (OE-54045-68); this publication immediately preceded the present one for 1968-69.

Six predecessor surveys of organized occupational curriculums were conducted between 1956 and 1962. The report of the sixth survey in that series, published in 1965, was titled: Guide to Organized Occupational Curriculums in Higher Education. Graduates: July 1, 1961 through June 30, 1962; and Enrollments: October 1, 1962. (OE 54012-62, Circular No. 771).

The Present Report

This is the third annual report in the current series, providing data from the fourth HEGIS survey, which pertained to the year 1968-69. The data were collected from the HEGIS survey of Degrees and Other Formal Awards Conferred Between July 1, 1968 and June 30, 1969, part C, "Degrees and Completions Based on Less Than 4 Years of Work Beyond High School." Part C of the survey questionnaire is reproduced in the appendix of this report; the totals shown in each data cell on the questionnaire form are those obtained for the aggregate United States.

Tabulations with summaries of associate degrees and other formal awards in organized occupational curriculums, as well as associate degrees based on at least 2 years of work wholly or chiefly creditable toward the bachelor's degree, are presented in this publication. Included among awards in organized occupational curriculums are certain associate degrees and diplomas, certificates, or other formal recognition. These awards were conferred upon the completion of curriculums designed to prepare students for immediate employment in specialized positions that range from just below the professional level (which usually requires a bachelor's or higher degree for entry) to those requiring very limited specialized training beyond the high school level. The data for the tabulations on the organized occupational curriculums were obtained from sections 2, 3, and 4 of part C of the survey questionnaire. Section 2 divides the curriculums below the technical or semiprofessional level into the two broad categories of science- or engineering-related and nonscience- and nonengineering-related. Sections 3 and 4 treat curriculums at the technical or semiprofessional level. Section 3 has counts by field in science- or engineering-related curriculums, and section 4 has classifications by field in nonscience- and nonengineering-related curriculums.

CURRENT TRENDS

Associate Degrees

Counts of associate degrees conferred by 1,062 U. S. institutions of higher education in 1968-69 were obtained from section 1, part C, of the survey form. (See appendix.) Included in the counts were all associate degrees which were based on at least 2 years (but less than 4 years) of work wholly or chiefly creditable toward a bachelor's degree. Some of the associate degrees were awarded in arts, sciences, or general programs not occupationally oriented, while other associate degrees were awarded in organized occupational curriculums which also met the bachelor's-degree-credit criterion; the latter programs were also reported in section 3 or section 4, as appropriate, as organized occupational curriculums. No information was obtained on the extent of the overlap between section 1 and sections 3 and 4.

Data on associate degrees for the past three years (1966-67, 1967-68, and 1968-69) are statistically comparable, but the first survey in the series (1965-66) included all associate degrees without the specification that the work be creditable toward a bachelor's degree. In the tabulation that follows, comparisons of data for all four years are shown for the convenience of users of this publication, but the data for 1965-66 in relation to later years should be interpreted with caution.

Associate degrees, as reported, increased by 25.1 percent between 1965-66 and 1966-67. The two succeeding comparisons show increases of 14.5 percent and 15.0 percent, respectively, from 1966-67 to 1967-68 and from 1967-68 to 1968-69. In the latter two comparisons, percent increases for men were slightly greater than the percent increases for women. Number of women, as a percent of the total number of associate degree recipients, decreased slightly from 43.8 percent in 1966-67 to 42.5 percent in 1968-69.

Public 2-year institutions conferred 73 percent of the 184,113 associate degrees awarded in 1968-69, compared with 70 percent in 1967-68.

Associate Degrees
(associate in arts, associate in science,
and other associate degrees)

Note: For 1965-66, reports of all associate degrees were requested. In each of the following three years, the count of associate degrees was limited to those based on work wholly or chiefly creditable toward a bachelor's degree. In all four years the associate degrees reported were based on at least 2 years of work but less than 4 years.

Year	Total	Men	Women	Women as percent of total
1965-66	111,740	63,861	47,879	42.8
1966-67	139,731	78,505	61,226	43.8
1967-68	160,054	90,483	69,571	43.5
1968-69	184,113	105,879	78,234	42.5
Percent change:				
1965-66 to 1966-67	+25.1%	+22.9%	+27.9%	--
1966-67 to 1967-68	+14.5%	+15.3%	+13.6%	--
1967-68 to 1968-69	+15.0%	+17.0%	+12.5%	--

Awards in Organized Occupational Curriculums at the Technical or Semiprofessional Level

Data for organized occupational curriculums at the technical or semiprofessional level were collected for two general types of curriculums: Science-related or engineering-related curriculums, in section 3, part C, of the 1968-69 survey form; and a variety of other types of curriculums (nonscience- and nonengineering-related), including those related to business and commerce, in section 4, part C. For the years 1967-68 and 1968-69, survey data for these curriculums are considered statistically comparable, although the surveys were not completely identical. In 1968-69 three fields were added in the category of "health service curriculums": electroencephalograph technician, inhalation therapy technician, and optician; in these three fields the total awards reported in 1968-69 were, respectively, 11, 140, and 29 (totaling 180 for the three fields combined). Otherwise the two forms had the same coverage, and it is presumed that institutions giving awards in these three health service fields in 1967-68 would have included them in the category "other health service curriculums." Changes introduced in the 1967-68 survey were somewhat more extensive, as described in the publication for that year.

At the technical or semiprofessional level, combining data by type and length of curriculum, a total of 108, 088 awards were made in 1968-69, compared with 88, 082 in 1967-68. There were 20, 006 more awards in 1968-69, an increase of 22. 7 percent.

The tabular analysis which follows shows some comparisons between 1967-68 and 1968-69 that may be of interest. Increases are observed both for the longer (2 or more but less than 4 years) and the shorter (at least 1 but less than 2 years) curriculums, and also for the science- or engineering-related as well as for nonscience- and nonengineering-related curriculums. The largest percent increase, when data are separated by length and type of curriculum, was for the shorter curriculums that are science- or engineering-related--an increase of 29. 1 percent. On the other hand the smallest relative increase, 15. 8 percent, was for the shorter curriculums that are not science- or engineering-related; women predominate in this type of curriculum, but men were gaining more rapidly (38. 5 percent increase) than were women (9. 8 percent increase) between 1967-68 and 1968-69.

The largest relative gain for women was the 38. 7-percent increase in the shorter curriculums that are science- or engineering-related; here also the majority of awards (63. 4 percent in 1968-69) were to women.

Organized occupational curriculums at the technical or semiprofessional level

	Curriculums of 2 or more but less than 4 years		Curriculums of at least 1 but less than 2 years	
	Science- or engineering-related	Nonscience- and non-engineering-related	Science- or engineering-related	Nonscience- and non-engineering-related
Number of awards, 1967-68:				
Total	33,342	39,525	9,319	5,896
Men	22,325	19,156	3,820	1,237
Women	11,017	20,369	5,499	4,659
Number of awards, 1968-69:				
Total	41,149	48,083	12,027	6,829
Men	27,363	23,875	4,401	1,713
Women	13,786	24,208	7,626	5,116
Percent change, 1967-68 to 1968-69:				
Total	+23.4	+21.7	+29.1	+15.8
Men	+22.6	+24.6	+15.2	+38.5
Women	+25.1	+18.8	+38.7	+9.8
Women as percent of total:				
1967-68	33.	51.5	59.0	79.0
1968-69	33.	50.3	63.4	74.9

In the more popular, typically 2-year curriculums (2 or more but less than 4 years), men were accelerating faster than women in the nonscience- and nonengineering-related curriculums, where about half of the awards were to men; women were accelerating faster in the science- or engineering-related curriculums, where approximately one-third of the awards were to women.

At the technical or semiprofessional level, in 1968-69 the three leading categories of organized occupational curriculums with the number of awards made were: business- and commerce-related, 41,465; engineering-related, 26,736; and health service, 21,876.

Awards in Organized Occupational Curriculums Below the Technical or Semiprofessional Level

Section 2 of the survey instrument collected data on awards in organized occupational curriculums below the technical or semiprofessional level. The total number of awards reported at this level, combining data by type and length of curriculum, was 10,578 in 1968-69 (see table 8). Of this number, 3,953 awards were reported in science- or engineering-related curriculums and 6,625 in nonscience- and nonengineering-related curriculums. In the science- or engineering-related curriculums, there were 3,539 awards to men and only 414 awards to women; in these curriculums, 2-year programs accounted for 2,468 awards while 1-year programs had 1,485 awards. In the nonscience- and nonengineering-related curriculums, there were more awards to women than to men, 3,446 compared with 3,179; in these curriculums there were 4,109 awards in 2-year programs and 2,516 in 1-year programs.

When comparisons of data from the 1968-69 survey of awards in organized occupational curriculums below the technical or semiprofessional level were made with data from the 1967-68 survey, it became apparent that a number of institutions had misunderstood how to classify these curriculums, with the result that there was some over-reporting in 1967-68. It was judged that comparisons of year-to-year data would be more likely to reflect misclassification of curriculums than actual increases or decreases in the curriculums themselves. It was, therefore, deemed advisable not to present an analysis of year-to-year comparisons.

SURVEY COVERAGE AND METHODOLOGY

Institutions Included

The survey instrument was mailed to all institutions in the Office of Education's higher education survey universe for 1968-69 as described in Opening Fall Enrollment in Higher Education, 1968: Part A - Summary Data (OE-54003-68, Part A). The total survey included bachelor's and higher degrees as well as awards below the bachelor's level, and each institution was asked to supply data in all applicable parts of the survey. Extensive efforts were made by Office of Education staff to assure a full response from every institution known to grant degrees or other awards at any level.

Data reported in this publication were furnished by 1,249 institutions of higher education in the United States together with its outlying areas ("aggregate United States"). As far as the Office of Education could determine, these 1,249 institutions comprised the total number of institutions (in the survey universe) that granted associate degrees and other formal awards below the baccalaureate during the period from July 1, 1968 through June 30, 1969.

In 1967-68, reports were received from 1,135 of the 1,144 institutions surveyed. Of the nine institutions that did not respond in 1967-68, seven were not part of the survey universe in 1968-69; the other two were still in the survey universe and responded, reporting a total of 99 associate degrees and 122 awards in organized occupational curriculums at the technical or semiprofessional level. It would appear that lack of the 1967-68 data for these two institutions, Buffalo Diocesan Preparatory School (New York) and Latterday Saints Business College (Utah), did not seriously affect the 1967-68 data or interfere with the use of these data in making comparisons between 1967-68 and 1968-69.

Since each of the 1,249 institutions in 1968-69 responded with complete survey data as requested on awards below the baccalaureate, there was no necessity for the Office of Education to make any imputations or to provide estimates for any of the data categories.

The numbers of institutions for the 1968-69 survey were as follows:

	Public	Private	Total
Two-year institutions	572	254	826
Four-year institutions	178	245	423
Universities	62	28	90
Other 4-year	116	217	333
All institutions	750	499	1,249

The present report is limited to institutions in the Office of Education's higher education survey universe and does not include technical institutes and other institutions not eligible for inclusion in that universe. Many of these institutions, as well as business, industry, and labor, have technical education programs beyond the high school level that are aimed at meeting the needs of the individual and those who will employ him.

Degrees and Completions Based on Less than 4 Years

Included in this survey were all those associate degrees that were based on at least 2 but less than 4 years of postsecondary work wholly or chiefly creditable toward a bachelor's degree either at the reporting institution or by transfer to another institution. Also included were diplomas and other awards (any type of formal recognition) based on completion of organized occupational curriculums. (See appendix, section C, of the survey instructions for the criteria for inclusion in each of the four sections of the survey; the instructions also set forth the method for reporting associate degrees, the definition of organized occupational curriculums, and the types of baccalaureate programs which would not be appropriate for reporting in the survey.)

On account of the range of specialization of occupational training--from training for positions just below the professional level to training for much less specialized positions--such data were tabulated according to length of curriculum. The organized occupational curriculums were divided into those requiring at least 1 but less than 2 years of work and those requiring at least 2 but less than 4 years of work. A separation also was made between those curriculums that were below the technician or semiprofessional level and those at the technician or semiprofessional level.

Associate degrees awarded at the completion of an organized occupational curriculum preparing students for immediate employment and simultaneously creditable toward a bachelor's degree were reported both in the count of associate degrees and in the tabulations of organized occupational curriculums by field of study. Because of the partial duplication indicated, the number of associate degrees plus the number of awards in organized occupational curriculums is greater than the total number of individual students receiving awards.

Verification of Data

Each questionnaire was examined, analyzed, and verified in order to obtain complete and accurate data. Further, the data were compared with those in any available questionnaires for previous survey years. When necessary, reference was made to catalogs of institutions for criteria and descriptions of associate degree programs and organized occupational programs. The responses were also reviewed for adherence to the instructions accompanying the survey instrument.

Clarifying information was provided by many institutions regarding significant changes in programs which would account for large increases or decreases in their reports. When appropriate, institutions were contacted by letter or telephone to obtain verification or revision of the data reported. During the preparation of this report, the tabulations were carefully checked for internal consistency.

ORGANIZATION OF THE TABLES

The organization of the tables in 1968-69 is virtually the same as in 1967-68 except for one slight difference. Table 5 in 1967-68 presented data only on curriculums that were at the technical or semiprofessional level, whereas in 1968-69 the data are shown separately for curriculums at that level and below.

Table 1 summarizes all associate degrees, diplomas, and other formal awards based on less than 4 years of work beyond high school, by control and level of institution. Institutions are classified by level as "4-year" and "2-year." Within the "4-year" group, institutions are further classified as "universities" and "other 4-year and over." Classified as universities are institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools that are not exclusively technological. Other institutions offering 4 or more years of college-level work, but not meeting the criteria for classification as universities, make up the "other 4-year and over" group. The classification of "2-year institutions" includes junior colleges, technical institutes, and other schools offering at least a 2-year but less than a 4-year program of college-level studies. The degrees, diplomas, and awards shown in table 1 are distributed by State in table 2.

Table 3 presents associate degrees reported by each institution, by type of degree, sex of student, and State. The categories of degrees are: associate in arts, associate in science, and all other associate degrees.

All tables in the report except table 3 (which is restricted to associate degrees only) give information on organized occupational curriculums. Table 1 summarizes awards in organized occupational curriculums by length of program, but not by level; that is, programs at the technical or semiprofessional level are combined with those below that level. The same is true of the State totals in table 2 and the totals by control and type of institution and by State in table 4. Table 5 presents separate institutional listings, by State, for the two curriculum levels: programs at the technical or semiprofessional level, followed by programs below this level.

Tables 6 and 7 are restricted to occupational programs at the technical or semiprofessional level. Table 6 gives national totals for each field of study, by length of curriculum; table 7 parallels table 6, giving individual institutional counts by field and by length of curriculum.

For awards below the technical or semiprofessional level, institutional counts are provided in table 8. No field data were obtained for these curriculums, but table 8 shows data separately for the two broad curriculum classifications: science- or engineering-related; and nonscience- and nonengineering-related.

TABLES

TABLE 1.--ASSOCIATE DEGREES, DIPLOMAS, AND OTHER AWARDS BASED ON LESS THAN 4 YEARS OF WORK BEYOND HIGH SCHOOL IN INSTITUTIONS OF HIGHER EDUCATION, BY LENGTH AND TYPE OF CURRICULUM, SEX OF STUDENT, AND CONTROL AND LEVEL OF INSTITUTION: AGGREGATE UNITED STATES, 1968-69

CONTROL AND LEVEL OF INSTITUTION	BASED ON AT LEAST 2 BUT LESS THAN 4 YEARS						BASED ON AT LEAST 1 BUT LESS THAN 2 YEARS

APPENDIX

Reproduction of Survey Report Form

Data shown on the form are for the aggregate United States.

APPENDIX: REPRODUCTION OF SURVEY REPORT FORM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY
INSTRUCTIONS FOR COMPLETING
SCHEDULE I. DEGREES AND OTHER FORMAL AWARDS CONFERRED BETWEEN JULY 1, 1968 AND JUNE 30, 1969

(OE FORM 2300-2.1)

(PART C ONLY)

SCHEDULE I IS DIVIDED INTO THREE PARTS

PART A is concerned with **first-professional** degrees only.

PART B is concerned with **bachelor's, master's, and doctor's** degrees.

PART C is concerned with awards **below** the bachelor's level *(Associate in Arts degrees and other formal awards)*.

Many institutions will appropriately skip one or more of the three parts. If a particular part *(A, B, or C)* does not apply to you, please indicate that fact and forward that part to us along with those you did complete.

SEPARATE SPECIFIC INSTRUCTIONS ARE PROVIDED FOR EACH OF THE THREE PARTS

GENERAL INSTRUCTIONS FOR ALL PARTS

Please examine the definitions and instructions which accompany each part. If you need additional clarification on any of them, please call Dr. Marjorie Chandler, 202-962-7301, Washington, D. C.

1. **PROMPTNESS.** Registrars are respectfully requested to complete the report form by August 15, 1969.

If degrees or other awards were conferred in 1968-69 for the **FIRST TIME** in a field of study new to your institution, please place an "X" in column (4). This will save correspondence later regarding the entry.

2. **INCLUSIVE DATES.** Report degrees conferred from July 1, 1968 through June 30, 1969 including those granted at the end of the 1968 summer session.

3. **BRANCH INSTITUTIONS.** Please be sure to indicate in items 6 and 7 whether your report includes or excludes awards to students at branches of your institution. *(Please do not include awards by branches outside the United States, its Territories, or possessions.)*

INSTRUCTIONS FOR PART C, DEGREES AND COMPLETIONS BASED ON LESS THAN 4 YEARS

1. Report in Section 1 all associate degrees based on at least 2 years of work that is wholly or chiefly creditable toward a bachelor's degree in your institution or by transfer to another institution. Include (1) all associate degrees awarded to students not in organized occupational curriculums and (2) all associate degrees awarded to students in organized occupational curriculums that are reported in columns 4 and 5 of Sections 2, 3, and 4, provided such degrees are based on work wholly or chiefly creditable toward a bachelor's degree. Thus, for example, a student who completed an organized occupational program in Chemical Technology and received an Associate in Science degree would be included both in Section 3 *(Item 2619)* and in Section 1 *(Item 0040)*, provided that the work which he had completed was wholly or chiefly creditable toward a bachelor's degree.

2. Report in Sections 2, 3, and 4 completions of WHOLE CURRICULUMS only, NOT INDIVIDUAL COURSES. For purposes of this survey, an ORGANIZED CURRICULUM is one which meets all four of the following criteria:

A. High school graduation *(OR ITS EQUIVALENT)*, but no work beyond high school, is required for admission to the curriculum. The general level of these curriculums is the first one to three years beyond high school

B. The curriculum is a series of required and elective courses constituting an integrated program designed to prepare students for IMMEDIATE employment in a SPECIFIC occupation or cluster of occupations. A group of courses, even though all of them are in a given subject area, do not necessarily constitute a curriculum.

C. Completion of the curriculum requires at least one but less than four years of full-time attendance, or the equivalent in part-time attendance over a longer period. A "year" means an academic year of approximately nine months.

D. The curriculum leads to ANY type of formal recognition *(certificate, associate degree, diploma, a transcript recognizing successful completion, a statement of completion from an administrator of your institution, or other FORMAL recognition)* signifying that the student has completed an organized curriculum; or the State grants a license or other formal recognition, upon examination, to all graduates of the curriculum.

Report in columns 4 through 7 of Sections 2, 3, and 4 only those associate degrees, diplomas, certificates, or other formal awards signifying the completion of organized curriculums which prepare for occupational competence in the specified fields or areas. The associate degrees reported here should also be included in the totals requested in Section 1. Formal awards other than associate degrees in organized occupational curriculums should be reported only in Sections 2, 3, and 4.

3. Note that, for purposes of this survey, organized occupational programs are NOT designed as the equivalent of the first one, two, or three years of a baccalaureate degree program. Example: pre-engineering is NOT an organized occupational curriculum as defined in this survey, because it is designed to prepare students for continuation in the regular engineering program. Engineering technology IS an organized occupational curriculum, as defined in this survey, because it is designed to prepare students for immediate employment upon completion. Note that work taken in an organized occupational curriculum may be partly or wholly creditable toward a bachelor's degree and it may lead to an associate degree; the essential point is that the organized occupational curriculum prepares for immediate employment in a specific occupation.

4. Fields of study are the same as those used in 1967-68 with the following additions:

Health Service Curriculums

Electroencephalograph Technician
Inhalation Therapy Technician
Optician

NAME OF INSTITUTION

1. INSTITUTION CODE NUMBER

PART C. DEGREES AND COMPLETIONS BASED ON LESS THAN 4 YEARS OF WORK BEYOND HIGH SCHOOL

SECTION 1. ASSOCIATE DEGREES *(Based on at least 2 years of work that is wholly or chiefly creditable toward a bachelor's degree in your institution or by transfer.)*

ITEM NO. (1)	TYPE OF ASSOCIATE DEGREE (2)	LINE NO. (3)	MEN (4)	WOMEN (5)
0010	ASSOCIATE IN ARTS	1	62,524	51,360
0040	ASSOCIATE IN SCIENCE	2	23,016	13,748
0070	ALL OTHER ASSOCIATE DEGREES	3	20,339	13,126
0090	**TOTAL ASSOCIATE DEGREES**	4	105,879	78,234

SECTION 2. ORGANIZED OCCUPATIONAL CURRICULUMS **BELOW** THE TECHNICAL OR SEMIPROFESSIONAL LEVEL

(1)	CURRICULUMS (2)	(3)	CURRICULUMS OF 2 OR MORE BUT LESS THAN 4 YEARS MEN (4)	 WOMEN (5)	CURRICULUMS OF AT LEAST 1 BUT LESS THAN 2 YEARS MEN (6)	 WOMEN (7)
2700	SCIENCE-OR ENGINEERING-RELATED	5	2,240	228	1,299	186
9200	NONSCIENCE-AND NONENGINEERING-RELATED	6	2,297	1,812	882	1,634
0092	**TOTALS FOR SECTION 2**	7	4,537	2,040	2,181	1,820

SECTION 3. SCIENCE-OR ENGINEERING-RELATED ORGANIZED OCCUPATIONAL CURRICULUMS AT THE TECHNICAL OR SEMIPROFESSIONAL LEVEL *(Awards counted in Section 2 should NOT be counted again in Section 3 or 4)*

	ENGINEERING-RELATED CURRICULUMS					
2606	AERONAUTICAL TECHNOLOGY	8	996	4	527	1
2610	ARCHITECTURAL OR BUILDING TECHNOLOGY	9	2,137	33	142	5
